-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of claiming the benefit under 35 U.S.C. 119(e) of United States provisional application, 60/503,911 filed on September 18, 2003.

Specification

2. The disclosure is objected to because of the following informalities: The continuation data should be inserted between the title of the invention and the first line of the Specification. Appropriate correction is required.

Claim Objections

3. Claim 2 is objected to because of the following informalities: the phrase, "capable of" in line 1 appears to be indefinitely claiming the invention. It is respectfully suggested to replace it with -- for --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless--

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Korsunsky et al. (US 5,936,222).

Re claim 1, Korsunsky et al. disclose a smart card reader (10 or 110) for usage with a smart card to reduce card abrasion (col. 2, ll. 8-13; col. 4, ll. 55-59) comprising:

Art Unit: 2876

a receptacle (Fig. 1), where the receptacle includes at least one open side (a card insertion opening 18);

at least one placement tab (46 and 48), where the at least one placement tab extends into the receptacle (col. 3, ll. 19-23) and secures the placement of the smart card (60) in the receptacle; and

a plurality of contacts (22 and 23) residing within the receptacle where the plurality of contacts connects to a smart chip within the smart card upon placement of the smart card in the receptacle (col. 3, ll. 11-18).

Re claim 2, Korsunsky et al. disclose the smart card reader as recited in rejected claim 1 stated above, wherein the plurality of contacts (22, 23) is capable of resiliently contacting a smart chip on a smart card (col. 3, ll. 11-18; col. 4, ll. 18-32).

Re claim 3, Korsunsky et al. disclose the smart card reader as recited in rejected claim 1 stated above, further comprising:

a contact plate (contact receiving area 32) within the receptacle of the card reader that includes the plurality of contacts (22, 23); and

a plurality of electrical leads from the contact plate (col. 3, ll. 8-10).

6. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugimoto (US 5,729,000).

Re claim 4, Sugimoto discloses an IC card reader (2) for usage with a smart card to reduce card abrasion (col. 4, ll. 35-61) comprising:

a receptacle (a container having a space for receiving an IC card comprising a lower cover 10 and an upper cover 20), where the receptacle includes at least one open side (22);

Art Unit: 2876

a receptacle lip (Fig. 3) extending around three sides of said receptacle and securing the placement of the smart card (IC card 1) in the receptacle; and

a plurality of contacts (card connector 31 is installed at a position opposing to the external terminal 1a (a plurality of contact pads shown in Fig. 2) of the IC card 1) residing within the receptacle where the plurality of contacts connects to a smart chip within the smart card upon placement of the smart card in the receptacle (Fig. 2 and 3; col. 4, ll. 25-61).

Re claim 5, Sugimoto discloses the IC card reader as recited in rejected claim 4 stated above, wherein said receptacle lip resiliently maintains the smart card in contact with the plurality of contacts (Fig. 2 and 3; col. 4, ll. 25-61).

Method claim 6 is essentially the same in scope as apparatus claim 4 and is rejected similarly.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

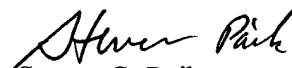

Lee (US 5,331,139) discloses a card reader that comprises an anti-abrasion member for minimizing the card contact abrasion; Masuzawa et al. (US 5,015,830) discloses an electronic card reading apparatus for reading data stored in an electronic card.
